

Navigation Suggestions

Dual navigation system

1. Lines
 2. Other items
-
1. Lines – main feature at top broken into categories
 - a. Living
 - b. Bed
 - c. Dining
 - d. Office
 - e. Collections
 - f. Eco-Friendly
 2. Other Items
 - a. Home
 - b. Showroom
 - i. Change to “About Decorum”
 - ii. Create Sub-Categories
 1. Locations – combine VA Beach and Norfolk
 2. Community doesn't seem necessary and does nothing for Va Beach location
 3. Employment page has been deleted – do you want?
 4. Meet the owner – would like to see video on home page and rotate between the three and delete from top menu item
 5. How to buy – not sure this page is necessary – could possibly just change to info on financing
 - c. Design – may want to consider moving it here with item on main slideshow on home page (need more discussion)
 - d. Sales – html, not jpeg of ad – with link on home page
 - e. Manufactures – are these required due to relationship with Manufacturer? Seems redundant since you have these items in your line set. Don't want to delete, just would like to do something different with fewer links
 - f. Newsletter – would like to remove as a separate page, but create a small module on all the pages (see HRBOR.org as example)
 - g. Contact us – a must

Main concerns:

- Navigation needs to be intuitive
- Need content on home page
- Flash on entry – either selection of lines with moving tag or promotions that change
